## Platforms

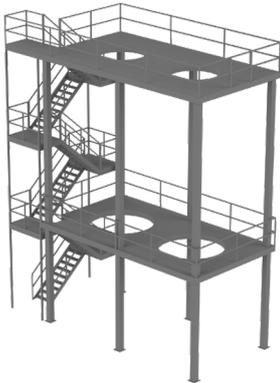

Our company is specializing in building of the different types of platforms. They can stand alone, they can be placed or adjusted to the existing machine or machines. We are producing tailor made solutions according to the individual requirements and norm DIN EN ISO 14122. The biggest construction was made for 3 Stage Waste Heat Evaporator. Platform can be delivered in carbon steel, stainless steel or can be galvanized. We can perform FEM calculation of the platform and guarantee that construction will be safe.

Tubular hand railing

Stainless steel or carbon steel platform

On-site installation

Steel brushed or polished
