

# Continuous Tube Coil Dryer

Continuous Tube Coil Dryer is perfect for the continuous drying of raw material with low-fat content. For instance: blood, feathers, and fish meal. It is ideal for use in the production of high-quality and high-protein meals. Drier can heat not only by the shell but also by the rotor improving the thermal efficiency of the machine. The machine consists of a horizontal stator and a rotor.

Simple installation

Reliable and durable

Easy to control

Very good quality of dried product

TCD-400	400	14100	4300	3500

⇒ Blood drying  
 ⇒ Feather rendering

⇒ Fish meal

This dryer is designed with several rotary coils heated by steam to dry the passing charge. Each heating coil is equipped with paddles which are pushing the material from inlet to outlet of the machine. According to the different properties of the dried material, the machine can be made of carbon or stainless steel.
